

home theater system

“Marchand Technologies took the time to go over the immense options on the home entertainment front and came up with a system that not only fit our budget, but that fit snugly in our home.”

-Bryan Kramer

Whether you want a theater system with ceiling drop-down plasma HD screens, automated curtains, acoustic panels, and self-dimming lights, or you simply desire an upgrade from your television's inadequate factory-installed audio, Marchand Technologies will customize a system that fits your needs.

We understand that design is important. How the equipment fits and looks in your home is equally important to how it functions. Consolidating traditionally bulky devices, such as flush mounting speakers, implementing a universal remote, and tucking away modern components will reduce clutter and help the equipment seamlessly meld into your home's decor.

A properly installed, state-of-the-art system can do the following:

- Boost your home's resale value
- Decrease the clutter in your home
- Impress potential clients and recruits
- Increase the quality of your leisure time

Marchand Technologies technicians are trained to familiarize themselves with state-of-the-art equipment long before it becomes mainstream and will walk you through the myriad of options before connecting a wire. Our experts thoroughly conceptualize the design of your home theater system, because even the best equipment will perform sub-optimally without formal environmental planning and calibration.

Home entertainment system options include:

- Flat Screen/Plasma/HDTV
- Networked gaming
- DSL & Cable
- Broadband enhancements
- State of the art audio equipment
- Speakers, hardware and other types of systems

Contact us today to see how an investment in a home theater system installed by Marchand Technologies will allow you to live a life of leisure that exceeds your expectations.
