

smart home technologies

Smart homes are not just a fad or a luxury item – they are here now and are a wise investment that leverage today's technologies to improve the quality of your life.

Marchand Technologies will help you conceptualize and design the ideal smart technology system for your home. Whether you want a simple entertainment and security system, or you desire the most extravagant, fully-integrated system available that automates appliances, enables remote access capabilities and produces the ultimate in entertainment options, Marchand Technologies can design and install it for you to enjoy.

Increase your luxury of living

- Set lights, heating, and appliances to operate at the most ideal times, promoting energy efficiency and convenience
- Remotely start your oven or hot tub to start as you leave the office, so it's ready to use upon your arrival
- Automatically or remotely feed pets
- Reduce clutter with a universal remote control and hidden A/V components

Craft your environment to increase your freedom

- Enable the physically-challenged to open curtains or start appliances with the touch of a button or voice command
- View live or archived security video on your TV at home, or remotely while you're away
- Watch children or pets while you're away, to ensure their safety
- Easily reset your security system to accommodate your changing needs

Increase your fun and connectivity

- Game or watch movies on a drop-down ceiling screen or plasma TV
- View your vacation videos or photos anytime from any computer
- Install consoles in every room to communicate in comfort
- Share music libraries from a single source

A smart home designed by Marchand Technologies will seamlessly integrate several systems that increase efficiency, convenience, and the quality of your life. We take the time to thoroughly understand your goals before designing your system. Our technicians follow proven interview and installation procedures that ensure the system we recommend meets your needs today, as well as handles your future requirements.

Contact us today to see how an investment in a smart home by Marchand Technologies will accelerate your capability to live more efficiently and peacefully.
